PURE TRANSMISSION

Make A More Powerful Connection With
Furutech Pure Transmission Technology

New for 2009! ***The Monza LP Stabilizer*** ***Pure Transmission Technology for Your Valued Vinyl***

Furutech Co., Ltd., manufacturer of refined analog and digital audio and video cable and accessories, is delighted to unveil their new Monza LP Stabilizer, Pure Transmission technology for your valued vinyl.

La Grande Épreuve

Grand Prix racing's single focus: Testing the absolute limits of technology and performance for that final 10th of a second that makes the difference between victory and defeat. Furutech builds each and every cable in their line the same way; optimized engineering solutions applied to advanced materials and processes, backed by utterly meticulous build quality.

The beautifully finished precision machined nonmagnetic stainless steel base and top modules are girdled by a layer of damping carbon fiber. The bottom surface is covered with 16 concentric cushioning grooves made of an extremely effective Piezo Electric damping material.

The Piezo Effect and Your Valued LPs

Furutech's Pure Transmission Piezo Ceramic Carbon series products--like the Innovations award-winning FI-50 connector series--feature a remarkable "active system" construction. We create a unique material with two "active" materials: Nano-sized ceramic particles and powdered carbon. Only nano-sized ceramic particles effectively couples with carbon powder for the piezo effect to occur. Nylon and fiberglass are incorporated into the construction as well, and the whole forms an extremely effective mechanically *and electrically* damped material. That's not a misprint; it's electrically damped as well.

Piezoelectric effects are the key. Furutech's employs these nano-sized polycrystalline ferroelectric ceramic particles exhibiting *electro-generative* properties (mechanical pressure creates an electrical charge) with carbon powder that exhibits *thermal-conductive* characteristics that interacts with the electrically charged ferro-ceramic particles converting their energy into heat that's conducted away and released from the surface of the material and in doing so making the connection between electrical and mechanical oscillation. The mechanical and electrical damping effects occur while "interconverting" thermal, mechanical, and electrical energy acting as the perfect weighted surface for your LPs.

That's how far Furutech goes to achieve Pure Transmission LP playback, and the Monza.

Furutech was honored with a Best of Innovations 2009 award for what may be the most sophisticated and thoroughly engineered AC connectors in the world, the FI-50 Series, now standard equipment on the Furutech Piezo Powerflux AC cord.

Furutech make other award-winning analog accessories like the DF-2 LP Flattener, the DeMag, DeStat, SK-II LP Brush, and the Ag-12 Phono Cable.

Furutech's Evolution Series was
awarded The Absolute Sound
Editors' Choice Award in both
2007 and 2008

About Furutech

Furutech makes a wide variety of high performance 15A and 20A A/V cable and power connectors and parts, as well as distribution/filtering products like the new 120Hz standard xv1.3 HDMI cable, Ag-12 Silver Tonearm Cable, Pure Power 6, e-TP4+4, e-TP609 and e-TP60 Power Distributors, and e-TP80 Power Filters, deMag Disc and Cable Demagnetizer, the deStat, a fan-driven, Balanced Ion Drive device for totally eliminating static from LPs and CDs, DF-2 LP Flattener, lightweight and stylish FRD Room Diffusion Panels, PC-2 Disc Pure Cleaner, and their own very special NANO Liquid Contact Enhancer, plus even more fine cable and OEM products.
