## Audio Note™ Driver or Interstage Transformers.

It is becoming increasingly obvious that applying transformer at every stage of an amplifier yields a great benefit in sound quality, provided off course the transformer in question is of an appropriate quality and design.

Replacing any coupling capacitor with a well designed and correctly matched driver or interstage transformer yields an almost shocking improvement in sound and should be tried to fully understand what a good wideband transformer has to offer.

All Copper – Copper transformers have copper lead out wires, Copper – Silver have copper on the primary and Audio Note silver leadout wires on the secondary and silver naturally silver all round.

Order Code	NEW ORDER CODE	Suggested Valves	Winding Primary - Secondary	Core Material	Standing Current, where applicable	Stepdown Ratio
TRANS-013	TXI-013-1-IE-IAPT-IAPT-FC	ECC82, 5687, E182CC, 6SN7, 6463	Copper	M4 I-E	10mA	1 : 1
TRANS-013/01-A	TXI-013-1-I-IAPT-IAPT-FC	As above	Copper	AN Improved HiB	As above	1 : 1
TRANS-013/01-AS	TXI-013-1-S-IAPT-IAPT-FC	As above	Copper	AN Super HiB	As above	1 : 1
TRANS-013/01-AN	TXI-013-1-U-IAPT-IAPT-FC	As above	Copper	AN Ultra HiB	As above	1 : 1
TRANS-013/02-A	TXI-013-2-55-IAPT-ANPT-FC	As above	Copper – Audio Note™ Silver	AN Super HiB	As above	1 : 1
TRANS-013/02-AN	TXI-013-2-S-IAPT-ANPT-FC	As above	Copper – Audio Note™ Silver	AN Ultra HiB	As above	1 : 1
TRANS-013/02-B	TXI-013-2-50-ANPT-ANPT-SC	As above	Copper – Audio Note™ Silver	AN-Perma 50% Nickel 0.08mm	As above	1 : 1
