

POWER PORT

High-end AC receptacle that is the starting point for any properly built AC foundation. By installing the Power Port AC receptacle in your AV room, you gain an immediate improvement in performance over a standard wall receptacle. The Power Port™ is a custom built, isolated ground, 15 to 20 amp receptacle that will insure a life-long level of excellence. The Power Port exceeds hospital grade for grip strength, contact resistance and current delivery. Easy to install in your wall, this is one component you need in your listening room. 15 coats of polished nickel over high-purity brass, with the “grip of Mickey Mantle” and polished nickel plated hardware, this a must have in your system.
